HOW TO RUN CASE IT SOFTWARE ON A MAC (MOJAVE OR EARLIER ONLY)

Follow the steps below if you want to run Case It on **Mojave or earlier** Mac operating systems, and you are unable to acquire the Windows operating system^{*}. To run Case It on **Catalina** or later Mac operating systems, <u>follow these instructions</u> instead of the steps below. <u>Click here</u> to determine your operating system.

*Case It is a native Windows application, so if you are eligible to download <u>Windows 10 Education</u> then you should acquire it and use <u>Boot Camp</u> to install Windows on your Mac. Case It will run faster, among other advantages. Windows 10 Education is free if your school has a Volume Licensing Program with Microsoft. <u>Click here</u> to determine if you are eligible to download it.

1. Download two files separately from the <u>Case It web site</u>: one file called "Wine Stable 203 and XQuartz 2711.zip", and a second file called "Case it v704 PC.zip" (same as Case It v7 PC.zip in the image below).

- 2. First, double-click on "Wine Stable 203 and XQuartz 2711.zip", and open the extracted folder.
- 3. Next, double-click on XQuartz-2.711.dmg as shown below:

4. The XQuartz package will appear. Double click on the package:

5. You may need to provide an administrative password to install XQuartz.

	Installer is tr	rying to install new software.	
	Enter your pass	sword to allow this.

9. Once Wine Stable is installed, double-click the "Case It v7 PC.zip" file to unzip it.

10. Right-click on the Case It v7.0.4.exe file, and select "Get Info" from the drop-down menu that appears (note that your file will be be named v7.0.4.exe rather than Case It v7.exe)

11. Select "Wine Stable.app" as the default to open Case It, and use the "Change All" button to open all similar documents with Wine Stable. This is because Case It works with the PC version of MEGA bioinformatics software. This is the only time you will have to do this.

14. Another screen will appear asking to install Gecko. Click the **Cancel** button, as Gecko is **not** necessary to run Case It.

15. Case It will now open to the first splash screen (slightly different in appearance from the one below). <u>Immediately close Case It by clicking the red close button in the upper left-hand corner</u>, and then **restart** it by double clicking on the Case It v7.0.4.exe file. This is the only time you will have to do this.

16. After Case It reopens, click on the 'Click here to begin' button and the second screen will appear: Click the 'Click to continue' button after reading the information on this screen.

17. You will then see the Data Screen. Consult information in the Help Window (and online <u>tutorials</u> at for instructions on how to run the various analyses of Case It.
